WEB SITE: www.masd91.org**HEALTHY AND SAFE SCHOOLS PLAN***Preliminary Plan*

Each school district, education service district, and public charter school must develop a Healthy and Safe Schools Plan for all buildings owned or leased by the school district or public charter school where students and staff are present on a regular basis.

School districts, education service districts, and public charter schools must submit a preliminary draft of the Healthy and Safe Schools Plan to the Department of Education on or before **October 1, 2016**. School districts, education service districts, and public charter schools must submit the final draft of the Healthy and Safe Schools Plan to the Department of Education on or before **January 1, 2017**. Thereafter, school districts, education service districts, and public charter schools must annually submit an updated Healthy and Safe Schools Plan if new buildings are acquired, constructed, or leased or if the plan is modified by the school district, education service district, or public charter school.

The Department of Education has developed this model Healthy and Safe Schools Plan to assist school districts, education service districts, and public charter schools. Under each section, information has been provided in italics to help districts understand what is required to be included in the plan and where districts can locate resources for that particular component of the plan. In developing this model plan, the Department has sought the input of the Oregon Health Authority Public Health Division, the Oregon Department of Environmental Quality and other stakeholders.

The model Healthy and Safe Schools plan is intended to be a guide and, if used, should be modified by the school district, education service district, or public charter school. School districts, education service districts, and public charter schools are not required to use the Department of Education's model plan. A school district, education service district, or public charter school may adopt any plan that complies with the requirements or OAR 581-022-2223.

1. Responsible Person

OAR 581-022-2223(5)(a) states that the Healthy and Safe Schools Plan must include the position within the school district's or public charter school's administration responsible for maintaining and implementing the Healthy and Safe Schools Plan.

The person responsible for maintaining and implementing the Healthy and Safe Schools Plan is:

Name: Troy Stoops
Position: Superintendent
Contact information: PO Box 1129
Mt. Angel, Or 97362
503-845-2345
Stoops_troy@mtangel.k12.or.us

2. List of Buildings

OAR 581-022-2223(5)(b) states that the Healthy and Safe Schools Plan must include a list of all facilities that are included in the Healthy and Safe Schools Plan.

This plan covers the following buildings:

| Building Name | Building Address |
|------------------------------|---|
| St. Mary's Public School | 590 E. College St., Mt. Angel, Oregon 97362 |
| Mt. Angel Middle School | 460 E. Marquam St., Mt. Angel, Oregon 97362 |
| John F. Kennedy High School | 890 E. Marquam St., Mt. Angel, Oregon 97362 |
| Mt. Angel SD District Office | 730 E. Marquam St., Mt. Angel, Oregon 97362 |

3. Radon

OAR 581-022-2223(5)(c) states that the Healthy and Safe Schools Plan must include a plan to test for elevated levels of radon as required under ORS 332.167

The district has adopted a radon plan as required by ORS 332.167. Community members can access a copy of the radon plan here: www.masd91.org. Test results will be made public and posted to the district website here: www.masd91.org.

4. Lead in Drinking water

OAR 581-022-2223(5)(d) states that the Healthy and Safe Schools Plan must include a plan to test for and reduce exposure to lead in water used for drinking or food preparation. If the district, education service district, or public charter school does conduct lead testing of drinking water, an Oregon Health Authority accredited lab must be used for all testing.

In developing a plan to test for and reduce exposure to lead in water used for drinking or food preparation, the following components are recommended by the Oregon Department of Education and the Oregon Health Authority:

1. **Identify sources of lead:** Mt. Angel School District has identified all sources of water to test for lead content in school district buildings. We are currently in the process of testing each source. We expect to have all testing complete by October 31, 2016.
2. **Stop access:** At this time we have no information that indicates any water sources in our district should be terminated or denied access.
3. **Communicate:** We have completed about 65% of testing water sources in our district buildings. Initial results were reported to the district school board of directors on August 8, 2016. Results are posted on the district website as they become available; www.masd91.org.
4. **Mitigate and correct:** No corrections needed at this time.

The EPA's 3Ts technical guidance is available here:

https://www.epa.gov/sites/production/files/2015-09/documents/toolkit_leadschools_guide_3ts_leadschools.pdf

5. Lead Paint

OAR 581-022-2223(5)(e) states that the Healthy and Safe Schools Plan must include a plan to reduce exposure to lead paint that includes the following compliance with the United States Environmental Protection Agency's Renovation, Repair and Painting Program Rule.

In order to comply with the United States Environmental Protection Agency's Renovation, Repair and Painting Program Rule, the district has utilized independent contractors to test for lead paint during renovation and repair projects. During major bond project renovations, 2013-2016 in the district's two oldest buildings, all testing revealed no existing evidence of lead paint in district buildings or facilities.

6. Integrated Pest Management

OAR 581-022-2223(5)(f) states that the Healthy and Safe Schools Plan must include a plan to implement integrated pest management (IPM) practices as required under ORS 634.700 through 634.750.

The district has adopted and is in full compliance with an integrated pest management plan as required by ORS 634.700 through 634.750. Community members can access a copy of the IPM plan here: www.masd91.org.

7. Communication

OAR 581-022-2223(5)(g) states that the Healthy and Safe Schools Plan must include a plan to communicate results for all tests required under the Healthy and Safe Schools Plan that includes the following:

- Mt. Angel School District will report all test results identified in the District Healthy and Safe Schools Plan to the Mt. Angel School District Board of Directors at the first general meeting following the availability of testing results.
- Test results will be posted on the district website at www.masd91.org within 5 business days following being reported to the school board.
- All test results will be made available upon request from the district office in hard copy and requested language.
